

Montréal, at the Heart of Quantum Innovation

2026 Edition

So many reasons to invest in quantum in Montréal

- ▲ **A cutting-edge quantum ecosystem** built around research hubs, support organizations, and industry leaders
- ▲ **An industry driven by strategic public investments** (e.g., Canada's National Quantum Strategy).
- ▲ **A major hub of innovation:** university capital and leading Canadian city for university research funding
- ▲ **The presence of recognized foreign companies** conducting R&D activities in the quantum industry, such as Quandela and Ericsson
- ▲ **A large pool of highly qualified talent**, with 580,000+ jobs in STEM fields and close to 80,000 members registered with the Québec Order of Engineers
- ▲ **A cost advantage of 35% for quantum computing companies** compared to the average of the 20 largest metropolitan areas in Canada and the U.S.
- ▲ **A collaborative research ecosystem** fostered by the proximity of leading organizations such as Mila, the Institut quantique, and C2MI
- ▲ **More than 40,000 university students** enrolled in engineering and mathematics programs
- ▲ **Numerous incentives** to support research projects and promote investment

Why they chose to invest in Montréal

Ten years ago, I discovered an ecosystem in Montréal capable of propelling artificial intelligence companies forward, and I was struck by the strength of its support.

Today, as I create my third subsidiary, I feel the same momentum around quantum technology. So it was only natural that I chose to establish Qbitsoft's first international hub here.

Lionel Rigaud
Founder and CEO
QbitSoft

We chose Montréal as the location for our quantum machine learning R&D center. Now, this seems like an obvious choice to us, especially after building strong collaborative partnerships with Montréal institutes that are at the forefront of international research. We particularly appreciate the energy that all parties bring to the table to innovate.

Valérian Giesz
Co-founder
and Director of Operations
Quandela

Montréal was the natural choice for our quantum research hub, bringing together world-class public research programs such as MITACS and NSERC, leading universities, and strong, sustained federal and provincial investment. It also builds on our long-standing local presence and proven track record in cutting-edge research

Magnus Frodigh,
Vice President
and Director
Ericsson Research

Your strategic partner to support your establishment and expansion

We offer free support to foreign companies and subsidiaries established in the Greater Montréal area for their investment projects.

Strategic and operational support
(business plan, sectoral expertise)

Site selection assistance
(regional economic data, comparative reports)

Advice on funding sources (financial and tax incentives)

Access to an established network of partners, university institutions and research centres

Support for the recruitment of top international workers

Access to a specialized Canadian immigration team to streamline immigration processes
